

## PRODUCT OVERVIEW

### **HMK® S32**

#### **WATER-BASE IMPREGNATOR ENVIRONMENTALLY FRIENDLY, ODORLESS**

Provides protection against water, dirt, oil, and grease absorption. For interior and exterior use on well-absorbing natural stone, unglazed tile and manmade hard-surfaces. Best suited for honed and textured surfaces. Treated surfaces remain highly vapor permeable. S32 is UV resistant and leaves a natural appearance. Also works effectively as a Pre-grout sealer / grout release. Since S32 is solvent-free, application in public areas (lobbies, hospitals, shopping centers, supermarkets, etc.) is possible while still being occupied.

### **HMK® S34**

#### **SILICONE IMPREGNATOR**

A high performance silicone base impregnator of highest stability against dirt, water, oil, and alkali infiltration. For interior and exterior use on all natural and cast stone and regardless of surface finish. Surface treated with S34 is 98% vapor permeable, UV resistant, and leaves a natural appearance.

### **HMK® S35**

#### **STONE SEALER - MATTE FINISH**

A modified silicone/acrylic base sealer which produces a tough, hard, and highly protective finish. S35 protects against water, dirt, and oil infiltration. For interior and conditional exterior use on honed and textured mineral surfaces. S35 enhances the stone's color and texture, while leaving a matte finish. S35 is highly vapor permeable, UV resistant, and slip retardant. Do not use on polished, glazed, non-absorbing surfaces, or wet areas.

### **HMK® S37**

#### **STONE SEALER - SATIN FINISH**

A modified acrylic base sealer which produces a tough, hard, and highly protective finish. S37 protects against water, dirt, and oil infiltration. For interior use on honed and textured mineral surfaces. S37 enhances the stone's color and texture, leaving a satin finish. S37 is highly vapor permeable, UV resistant, and slip retardant. Do not use on polished, glazed, non-absorbing surfaces, or wet areas.

### **HMK® S39**

#### **STONE SEALER - HIGH GLOSS**

A modified acrylic base sealer which produces a tough, hard, and highly protective finish. S39 protects against water, dirt, and oil infiltration. For interior use only on rough and textured mineral and some ceramic surfaces. S39 enhances the stone's color and texture, leaving a high gloss finish. S39 is highly vapor permeable, UV resistant, and slip retardant. Do not use on polished, glazed, non-absorbing surfaces, or wet areas.

### **HMK® S42**

#### **COLOR ENHANCING IMPREGNATOR**

A solvent base impregnator specifically designed for interior and exterior textured natural stone. Protects against dirt, water, oil and alkali infiltration. UV resistant and gives stone a slight darkening affect enhancing the stone's natural color.

### **HMK® R52**

#### **POULTICE/STAIN REMOVER SILICONE CAULKING, OIL AND WAX STAINS**

For use on all new and existing interior and exterior natural and cast stone, agglomerate, terrazzo, ceramic/Porcelain tile and cement surfaces, regardless of surface finish. Comes in paste form; ready to apply. Very effective in removing wax, oil and silicone stains left behind from grouting/sealants.

### **HMK® R55**

#### **INTENSIVE CLEANER/GROUT FILM REMOVER - ACID FREE -**

A superior pH 8.5 neutral cleaner for use on all new and existing interior and exterior natural and cast stone, agglomerate, and ceramic tile, regardless of surface finish. Especially formulated to remove cement/grout film residue, light construction dirt, soil, and light wax coats. Recommended for polished and honed surfaces since it does not contain acid and will not etch finishes.

### **HMK® R59**

#### **CERAMIC TILE CLEANER - ACID BASE -**

A mild, fast-acting, dilute acid type cleaner for all new and existing interior and exterior ceramic tile, and sanitary installations. R59 is a multi-purpose product; it thoroughly removes dirt, urine, calcium deposits, rust, and cement/grout film residue from surface and grout joints. Do not use on polished marble or limestone. If an acid base product is not an option, use the neutral R55 Intensive Cleaner/Grout Film remover instead.

### **HMK® R63**

#### **CONCRETE FILM REMOVER - ACID BASE - FOR PROFESSIONAL USE ONLY**

An extra strength, fast-acting, dilute acid type cleaner for all new and existing rough/textured interior and exterior natural and cast stone. R63 thoroughly removes construction dirt, grout residue, lime deposit, efflorescence, and rust from all surfaces. Not for use on polished/glazed surfaces. Avoid contact with metal; acid/fumes will cause etching. **NOTE:** R63 is not suitable for latex/resin modified grouts. Consider using R99 Special Stripper.

### **HMK® R65**

#### **TERRA COTTA CLEANER - ACID BASE - FOR PROFESSIONAL USE ONLY**

A heavy duty, fast-acting, dilute acid type cleaner for unglazed terra cotta, Mexican pavers, quarry tile, and brick pavers. R65 thoroughly removes dirt, grout/cement residue, lime deposit, efflorescence, and rust from all unglazed surfaces. Special inhibitors control oxidation of vanadium salts, manganese, pyrite and other metallic deposits commonly found in clay tile and brick. Avoid contact with metal; acid/fumes will cause etching.

## PRODUCT OVERVIEW

### **HMK® R77**

**RUST REMOVER-ACID BASE-FOR PROFESSIONAL USE ONLY**  
A heavy duty, dilute acid type cleaner for all rough/textured, and honed stone and masonry surfaces, both interior and exterior. R77 dissolves and removes rust, delaying, in most cases preventing, it's reformation. Do not use on polished surfaces, with the exception of polished granite.

### **HMK® R80**

#### **STRIPPER/STAIN REMOVER - ACID FREE**

Professional liquid stripper/stain remover for all mineral, porcelain/ceramic tile surfaces. Strips heavy wax coats, most sealers, varnishes, and other protective build-ups. Prepares the surface for application of new finishes. Ideal for removing paint, oil, grease, tar, and other stains (can be used in a poultice).

### **HMK® P01**

#### **3 IN 1 SPRAY CLEANER**

A ready-to-use product which has been specially developed for daily use on kitchen counters, bathroom vanities, table and bar tops, windowsills, and other surfaces made of natural or man-made stone. P1 cleans, maintains and protects in a one simple application, enhancing the beauty of existing surface while providing protection. Special ingredients in P1 enhance the performance of HMK impregnators (such as S34 Silicone Impregnator and S32 water-based Impregnator). P1 easily removes light dirt and grease while releasing a pleasant scent. Color and structure of the surface remain practically unchanged. P1 is a solvent-free product. After drying it is non-hazardous to your health. (LGA tested).

### **HMK® P6**

#### **HOME CARE KIT - POLISHED & HONED SURFACES R55 • S34 • P01**

HMK® P6 Home Care Kit has been specially developed for use on polished and honed mineral surfaces, such as kitchen counters, bathroom vanities, table and bar tops, windowsills, fire places, shower areas, and small entry ways. Use for both new and old installations.

### **HMK® P19**

#### **MARBLE AND GRANITE POLISH**

A modified silicone wax based conditioner and maintenance cleaner/polish/protector for interior use on floors, walls, and stairways for all polished mineral surfaces. P19 enhances the stone's color and texture. It further protects against dirt and water infiltration and creates a high luster and slip retardant surface. P19 is also recommended for countertops, shower stalls, fireplaces, etc. It also protects impregnators, sealers, does not smear or scuff, and beautifully maintains brass, bronze, and aluminum.

### **HMK® P21**

#### **POLISHING PASTE**

A modified silicone wax conditioner and maintenance cleaner/polish/protector for use on all interior polished mineral surfaces, agglomerate, and glazed ceramic tile. Especially indicated for use on counters, vanities, bar tops, windowsills, fireplaces, art objects, etc. Repeated use enhances the stone's color and protects against dirt and water infiltration. P21 Polishing Paste does not yellow or cloud, is UV resistant, and is highly permeable. It also protects impregnators and sealers, does not smear, and beautifully maintains brass, bronze, and aluminum.

### **HMK® P23**

#### **POLISH PRESERVER "NO RINSE"**

A modified water base acrylic conditioner and maintenance sealer/cleaner for all honed and polished natural and cast stone. For interior use only. Exhibits excellent durability. Scuff, scratch, dirt resistant and slip retardant. Creates satin sheen on honed surface and gloss on polished surface with buffing. P23 is UV resistant and highly permeable.

### **HMK® P24**

#### **LIQUID STONE SOAP "NO RINSE"**

A 100% natural, pH 7 maintenance cleaner and conditioner for all natural and cast stone, agglomerate and ceramic tile, regardless of surface finish. Regular use forms a protective, invisible dirt repellent and slip retardant film, which is highly permeable and scuff resistant. P24 has a totally natural appearance (cures clear) and colors in the stone become more vivid with repeated use.

### **HMK® P27**

#### **RE-POLISHING POWDER**

#### **FOR CALCAREOUS STONE AND TERRAZZO - FOR PROFESSIONAL USE ONLY -**

P27 Re-Polishing Powder restores the natural shine of all dull calcareous stone without coating the surface. Deep scratches and acid etch marks may be restored by first sanding the natural stone surface, then using P27. **NOTE:** P27 is not effective on granite, resin based agglomerate, or any other material devoid of calcium carbonate.

### **HMK® Z170-171**

#### **SEALING BRUSHES**

#### **9" (22 CM) & 21" (55 CM) IN WIDTH**

The perfect tools for the application of HMK® sealers, impregnators, and finishes on stone surfaces. Made from 100% natural boar's hair for extra durability. No synthetic fibers are used to obtain a soft textured brush, which guarantees countless even applications, and a thorough penetration of chemical finishes.
